You have a shoe-selling e-commerce platform. Now, the client wants to implement a new feature "Search". During the client meeting, they mentioned they wanted to make the search dynamic, with any keywords, or specific text. Now you have a chance to get into more details on the feature. You can ask 10 questions to the client. List the questions according to priority.

Q-1: Will there be any filter feature in the search section? Will it contain Price range, Male/Female, Sales etc. ?

Q-2: Will there be any saved search feature on the website? Like showing previous searches?

Q-3: Will the search be fully functional on mobile devices(mobile responsiveness) varying display size?

Q-4: Will the search engine suggest relevant text if I input the correct keyword partially in the search box?

Q-5: Will trending products or most demanding products show first when searching a product?

Q-6: Clicking over the search box, will I be able to type directly or do I need to click again?

Q-7: Output of searching irrelevant text?

Q-8: Are we allowed to make a blank search?
